

Philosophy

New Education for the Workplace (NEWCorp) believes the students considered at-risk are actually at-promise.

Our Philosophy

New Education for the Workplace (NEWCorp) believes the students considered at-risk are actually at-promise. Rather than view students as being at-risk of failure, NEWCorp views students as being at-promise of success. This core philosophy encourages a positive culture where students and staff thrive because the focus is placed on the abilities and strengths of every individual.

Partnership Philosophy

NEWCorp maintains this philosophy in its relationships with partners and affiliated organizations. NEWCorp values and emphasizes the positive competencies and contributions of all existing partners. This organizational culture strives to build, maintain, and strengthen mutually beneficial partnerships which are united in a common vision of positively transforming student lives.
